### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claims 7-8 which were non-elected without traverse. Accordingly, claims 7-8 have been cancelled.

The following is an examiner's statement of reasons for allowance:

Applicant's argument that the invention is directed to a spacer rod of an optical fiber is persuasive. The prior art of record does not teach or render obvious the instant method of producing a polyethylene spacer rod of an optical fiber using the claimed two-stage cooling. Multi-stage cooling using various cooling means (eg. air, air/water mixture, cooling bathes) is known in the general art of extrusion as shown by the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
